

# DIAGNOSE. MONITOR. CONFIRM.

FOR ALL PHASES OF *H. PYLORI* PATIENT MANAGEMENT

Meridian's next generation monoclonal rapid test for *Helicobacter pylori* antigen detection in stool

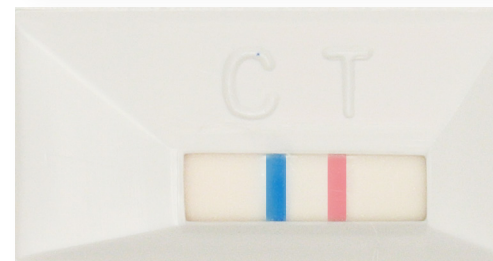

- ✓ **Performance** — Detects *H. pylori* active infection
- ✓ **Clinical Utility** — A non-invasive test for patients of all ages
- ✓ **Simplicity** — Clear, objective results within 5 minutes
- ✓ **Affordable** — No special equipment required

**ImmunoCard**  
**STAT! HpSA<sup>HD</sup>**

**NEW ASSAY HAS IMPROVED READABILITY,  
YET MAINTAINS THE SAME HIGH PERFORMANCE CLAIMS**

TEST COMPARISON USING SAME STOOL SAMPLE

## PERFORMANCE

- Active infection test for the accurate detection of *H. pylori* antigens in stool
- Fully complies with EHSg, ACG and AGA guidelines for *H. pylori* testing
- Serology is no longer recommended, because it does not detect active infection or used as a test of cure

## CLINICAL UTILITY

- One step test can be performed in 5 minutes
- Allows for appropriate patient treatment
- No complications with allergic reactions or diabetic patients

## SIMPLICITY

- Rapid turnaround time within minutes
- No special patient preparation required (i.e. fasting), unlike UBT or endoscopy.
- High Definition bands for excellent discrimination between positives and negatives

## AFFORDABLE TECHNOLOGY

- Does not require capital equipment purchase or rental
- Cost effective compared to endoscopy and UBT
