TEST COMPARISON USING SAME STOOL SAMPLE

## PERFORMANCE

- Active infection test for the accurate detection of *H. pylori* antigens in stool
- Fully complies with ACG and AGA guidelines for *H. pylori* testing
- Serology is no longer recommended, because it does not detect active infection or used as a test of cure

## CLINICAL UTILITY

- CLIA-waived test can be performed in 5 minutes
- Allows for appropriate patient treatment
- No complications with allergic reactions or diabetic patients
- No special patient preparation required (i.e. fasting)

## SIMPLICITY

- Rapid turnaround time within minutes
- Vivid color changes in testing window for objective results

## AFFORDABLE TECHNOLOGY

- Does not require capital equipment purchase or rental
- Covered by all health care plans
- Cost effective compared to endoscopy and UBT
