

Don't be misled about lead.

Did You Know?

It only takes
this much
lead →
to
poison
a child.

535,000 U.S. Children

have an elevated blood lead level annually.
Despite federal mandates, only a fraction
get the **required testing at ages one and two years.**²

**When it comes to lead exposure, it's best to test.
Ask about getting your child tested today!**
