<b>Description:</b>	Mycoplasma pneumoniae Cell Lys	ate Antigen (Strain FH)		
Source:	Mycoplasma pneumoniae Cell Cul Strain: FH	ture		
Format:	Cell Lysate			
Purification:	Harvested organisms are washed and processed in an extraction process using detergent. Antigen consists of a lysate or organisms enriched for P1 adhesion protein.			
Concentration:	1.0 mg/ml (BCA assay using BSA standard)			
Buffer:	Phosphate Buffer containing 2% n-Octylglucopyranoside			
Preservative:	None			
Applications:	Specific methodologies have not been tested using this product. Each laboratory should determine an optimum working titer for use in its particular application.			
Inactivation:	Detergent treatment. Confirmation	etergent treatment. Confirmation by attempted growth under original culture conditions.		
Storage:	Long term storage at ≤ -70°C. Avo	ing term storage at ≤ -70°C. Avoid multiple freeze/thaw cycles.		
Safety Note(s):	Refer to the appropriate Safety Data Sheet (SDS) for additional information.
