

## NGAL Antigen, Recombinant

Cat. No. 9278

STORE AT  $\leq -65^{\circ}\text{C}$ 

|                                |                                                                                                                                                                                                                     |
|--------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| DESCRIPTION                    | NGAL Antigen, Recombinant                                                                                                                                                                                           |
| SHIPPING & STORAGE INFORMATION | Store at $\leq -65^{\circ}\text{C}$ . Avoid multiple freeze / thaw cycles.                                                                                                                                          |
| SAFETY PRECAUTIONS             | Refer to the appropriate Safety Data Sheet (SDS) for additional information.                                                                                                                                        |
| NOTES                          | This reagent has been manufactured under ISO13485 quality management system and is suitable for research or further manufacturing use only. Centrifuge before opening to ensure complete recovery of vial contents. |

### General Features/Characteristics

|               |                                                                           |
|---------------|---------------------------------------------------------------------------|
| SOURCE        | CHO cells. Manufactured in the USA with no animal products.               |
| IDENTITY      | Western blot                                                              |
| FORMAT        | Purified, liquid                                                          |
| PURITY        | $\geq 95\%$ (Gel electrophoresis with Coomassie staining; gel permeation) |
| CONCENTRATION | $\geq 0.2$ mg/mL (OD280)                                                  |
| BUFFER        | PBS                                                                       |
| PRESERVATIVES | None                                                                      |

### Applications

Each laboratory should determine an optimum working titer for its particular assay format.
